

# Fanfold

Fanfold is available in many different qualities.  
Flute options:

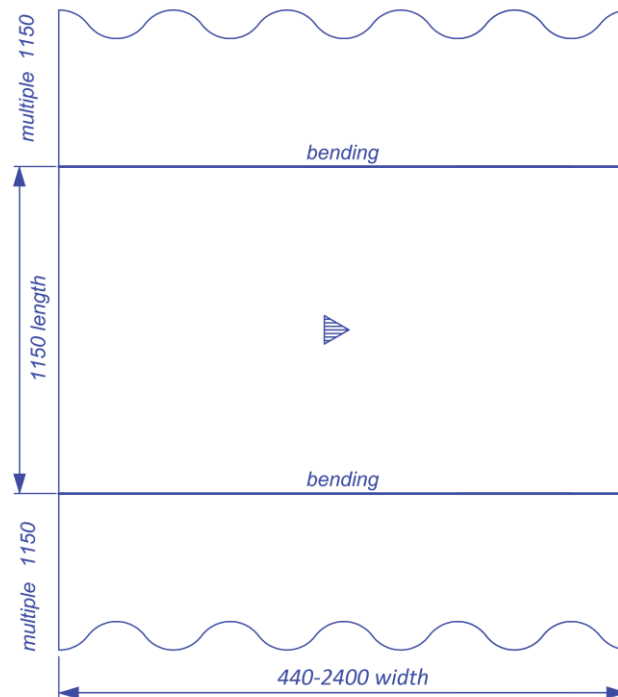

## continuous corrugated board, folded like a fan

The biggest advantage of fanfold is its use for packing many different products of various sizes, it eliminates stocks and extra costs by replacing many individual sizes of packages. It is also commonly used to protect goods during storage and transport. Fanfold can be easily folded to required length around the product and can be adapted to each individual package.

- 3 layers: **B | C**
- 5 layers: **EB | CB**

Wide range of available raw materials: kraftliner, testliner and possibility of combining both, allows to customize perfect packaging for every need. It is great solution for companies with large variety of products and limited needs for each of the packages.

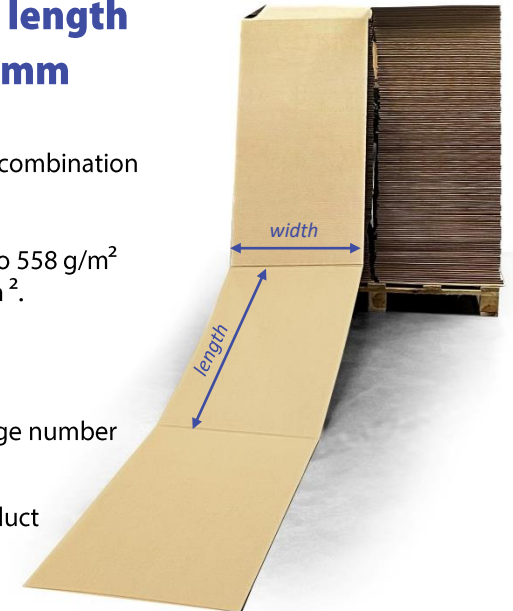

## Continuous, folded at 1150 mm length Width from 440 mm up to 2400 mm

Color of the cardboard can be brown or white, also combination of both possible.

Paper weight for 3-layer cardboard from 347 g/m<sup>2</sup> to 558 g/m<sup>2</sup> and for 5-layer cardboard from 564 g/m<sup>2</sup> to 825 g/m<sup>2</sup>.

### Benefits:

- reduces need for storage as it can replace large number of different packages
- possible to cut out ideal packaging for a product
- available on short lead-times
- universally usable
